Mr. Dr. Andreas

Dear Mr. Andreas

I am writing this letter to inquire about a possibility of practical experience in your company the following summer in the frame of IAESTE programme.

I am studying at the Technical University of Lodz at the Faculty of Technical Physics, Computer Science and Applied Mathematics. I am a student of the fourth year of the Applied Mathematics. Since the 6th semester my specialization is Mathematical Methods of Computer Science. During my studies I managed to get acquainted with mathematics, computer science and economy etc.(please see enclosed list of subjects studied). Last summer I had my internship at the University of Novi Sad, Faculty of Engineering. My work was about counting and generating triangular systems. Since January 2007 I have been a member of IAESTE Local Committee at the Technical University of Lodz and since February 2008 I am a president of this committee.

I have knowledge of simulation tools (Matlab, Maple, Statistica and others), programming skills (Turbo Pascal, SQL/PLSQL, T-SQL, Java) and database systems (Access, MS SQL Server, Oracle).

I am positive, that my computer skills, knowledge and abilities acquired at practical trainings and good communication enables me to meet your requirements. Moreover, I am considered as a responsible, open-minded, ambitious and hard-working person. Therefore, I hope that our cooperation will be at value for both sides.

If given this chance I can guarantee I will give my full attention to the work as I know that this traineeship will provide me with an increased knowledge and experience that will be great benefit to me for my further studies and not only.

I would like to thank you in advance for your consideration. Please feel free to contact me if you have any further questions or requirements.

I look forward to hearing from you.

Yours sincerely,

Piotr

Piotr
